Fiscal Year July 1, 2003 - June 30, 2004

Mission

The mission of the Nevada State Board of Nursing is to protect the public's health, safety and welfare through the effective regulation of nursing.

Introduction

ANNUAL
REPORT
2003-2004

What is the Nevada State Board of Nursing?

It is a seven-member board appointed by the governor consisting of four registered nurses, one practical nurse, one certified nursing assistant and one consumer member. The Board is advised by and appoints members to standing advisory committees. The Board appoints an executive director (a registered nurse), who is responsible for a staff of 20, which regulates a nursing population of more than 28,500.

What does the Nevada State Board of Nursing do?

The state legislature established the Board 80 years ago to regulate the practice of nursing. The scope of the Board's original responsibilities has grown dramatically since 1923, when it licensed 104 registered nurses. In 2004, it was responsible for licensing, certifying and disciplining more than 28,500 individuals, including registered nurses, licensed practical nurses, advanced practice nurses, certified nursing assistants, and certified registered nurse anesthetists. The Board's current functions include:

- Certify advanced practitioners of nursing, certified registered nurse anesthetists, and emergency medical service/registered nurses
- Approve education/training programs for ongoing competency

Discipline and Investigations

- Investigate complaints against nurses and nursing assistants
- Conduct disciplinary proceedings
- Administer remediation and rehabilitation programs, including:
 - Monitoring nurses and nursing assistants who are on disciplinary probation
 - Administering alternative program for nurses recovering from chemical dependency

What you'll find in this annual report

This report was designed to give answers to questions asked most frequently of the Board. It briefly describes our purpose and history. As an annual report, it covers the fiscal year 2003-2004, highlighting Board accomplishments and providing a statistical picture of nursing in Nevada.

Administration

- Establish minimum practice standards
- Develop and adopt regulations
- Appoint advisory committees to get direct nursing input
- Publish, distribute and provide education on the Nurse Practice Act
- Collaborate with consumers, individuals, groups and organizations
- Provide education to increase public awareness and understanding of the Board's role and purpose

Licensure, Certification and Education

- Approve schools of nursing and nursing assistant training programs
- Adopt exams for licensing/certification
- Issue certificates to nursing assistants
- License registered and practical nurses

History and Highlights

A Brief History

In 2004, the Nevada State Board of Nursing (NSBN) completed 81 years of service to the residents of Nevada. Established by the state legislature in 1923, it was modeled on legislation enacted by other countries and a few other states. The intent was to separate untrained “nurses” from those who had undergone formal training.

Nevada’s first school of nursing was established by St. Mary’s Hospital in 1909. An alumni association of the school’s graduates led the formation of the Nevada State Nurses Association in 1917. Its main objective was to “secure passage of a law providing state registration of nurses.”

Attempts to achieve this goal were made during the legislative sessions of 1915, 1919 and 1921, but all failed. In 1923, a bill was introduced by State Assemblywoman Marguerite Gosse of Reno. In spite of opposition, the bill was passed by both houses and signed into law by Governor James Scrugham on March 20, 1923.

Since its inception, the Nevada State Board of Nursing has grown from a three-member to a seven-member entity. Its functions and responsibilities have increased dramatically, as have the number of nursing care providers it oversees.

Ninety individuals have served on the Board, bringing hundreds of years of nursing experience with them. They have represented every nursing specialty and a wide range of health care settings.

In 1973, a consumer member was added to represent the viewpoint of the general public, and in 1995, a certified nursing assistant member was added to represent the CNA community.

Highlights of FY03/04

Responding to changes in the health care environment, the Board revised and updated several regulations and practice decisions, including:

LPNs and IV Therapy

It amended regulations regarding the delegation of intravenous therapy by RNs to LPNs, by deleting the requirement for 1,500 hours of clinical experience in nursing after initial licensure and the one-year experience requirement before beginning an IV therapy certification class.

The issue of LPNs administering intravenous therapy has been active for more than 20 years. Changes in practice and knowledge led to regulation revisions in the 1990s, and request for further changes were brought to the Board’s Nursing Practice Advisory Committee in 2002. The committee formed an LPN IV Therapy Task Force to collect data on national practices and outcomes. The recent regulation changes were based upon the task force’s recommendations.

Sexual Assault Nurse Examiners

After spending more than a year reviewing, discussing, and gathering national and Nevada-specific information and input from local, state, and national organizations, the Nursing Practice Advisory Committee presented to the Board a Sexual Assault Nurse Examiners (SANE) Practice Decision to supersede its 1991 decision. The Board adopted the decision, which provides for a national certification for SANE nurses, and an expanded scope of practice.

Masters Prepared APNs

Through their masters degree programs, advanced practitioners of nursing gain enough prescription-related knowledge and skills to apply for prescribing privileges after they graduate, rather than after 1,000 hours of practice. That was the conclusion of the Board’s APN Advisory Committee after reviewing the results of a survey and research; the Board agreed and adopted regulations eliminating the requirement.

Easing Nursing Faculty Shortage

Acting upon the recommendation of its Education Advisory committee, the Board adopted regulations that require at least 75 percent of nursing faculty to have masters degrees with a major in nursing, rather than 100 percent of the faculty.

As part of its continuing efforts to improve its services and save costs, the Board introduced several technological innovations in FY03/04, including:

Nurses Can Now Renew Licenses Online

The Board added a popular feature to its online services in FY03/04: rather than completing and mailing a paper renewal application, nurses can now renew their licenses on the Board’s website.

Discipline Statistics

If the Nevada State Board of Nursing receives information that a nurse or nursing assistant may have broken the law (the Nevada Nurse Practice Act), the Board has the authority to investigate.

It will only investigate if the complaint is received in writing, names a nurse or nursing assistant who is licensed or certified in the state of Nevada, is signed by the person making the complaint, and alleges a violation of the Nurse Practice Act.

Before disciplinary action is taken, the Board ensures the nurse or nursing assistant is given due process, which requires giving adequate notice and description of the charges, and a hearing or the opportunity for a hearing. The individual also has the right to a formal hearing, the right to an attorney, the right to not participate in an informal hearing, the right to not sign anything, the right to see the complaint, and the right to appeal.

If the evidence doesn't support the allegations, the complaint may be dismissed or closed. If the evidence does support the allegations, the Board can take disciplinary action against the individual.

The disciplinary penalty is determined based on a number of factors which include the severity and recency of the offense, extent of patient harm, degree of deviation from standard practice, evidence of rehabilitation, current ability to practice safely, mitigating or aggravating factors, and past disciplinary history.

Disciplinary action can include denial, reprimand, fine, suspension, probation, voluntary surrender, or revocation of a license or certificate. The Board considers each case individually.

FY03-04 Probation Statistics When considering what kind of disciplinary action it should take, the Board always asks itself, "What is needed to make this person safe to practice?" The answer depends on the nature of the violation. In many cases, the Board places individuals on disciplinary probation so that it can restrict, monitor and improve the person's practice.

The Board also has a very successful alternative monitoring program that allows qualified, chemically dependent nurses and nursing assistants to re-enter the workforce in a paced sequence. It also monitors their recovery to ensure the safety of their patients.

The statistics below include all people who were on probation as of June 30, 2004.

Board Advisory Committees

ANNUAL
REPORT
2003-2004

The Board is advised by and appoints members to standing advisory committees. These committees are composed of nursing professionals who are chosen based on expertise, geographic location and committee need.

Questions about nursing regulation and practice are brought to these committees for research, discussion and policy development. The Board considers the recommendations of its advisory committees during its regular meetings. Virtually every law, regulation and advisory opinion issued by the Board has been based on a recommendation by one of its advisory committees.

Committee openings are advertised in the Board's news magazine and on its website. Applications are reviewed and members are appointed at regularly scheduled Board meetings. One Board member serves as a liaison to each advisory committee; Board staff members serve as advisory committee chairs.

Advanced Practice Advisory Committee

The Advanced Practice Advisory Committee advises and reports to the Board on matters related to the practice of advanced practitioners of nursing. It consists of not more than seven persons who are knowledgeable in areas concerning APN practice.

The committee recommended, and the Board adopted, changes in regulation that eliminated the 1,000 hour practice requirement before master's-prepared APNs may apply for prescribing privileges.

Chair: Donald Rennie, MSN, RN, Associate Executive Director for Licensure and Certification

Liaison: David Burgio, MSN, RN, APN

Committee Members:

Amy Booth, MS, RN, APN (Reno)
Tricia Brown, MSN, RN, APN (Reno)

Martha Drohobyczer, MSN, CNM (Las Vegas)
Richard Null, MS, RN (Elko)
Phyllis Suiter, MS, RN, APN (Las Vegas)

Certified Nursing Assistant Advisory Committee

The Certified Nursing Assistant Advisory Committee is distinctive because its composition is defined by statute (NRS 632.072). Its duty is to advise the Board on matters relating to certified nursing assistants.

In FY03/04, the committee revised the CNA instructor/training program applications and the CNA renewal application. It also began revising the CNA Skills Guidelines.

Chair: Donald Rennie, MSN, RN, Associate Executive Director for Licensure and Certification

Liaison: Dorothy Perkins, CNA

Committee Members:

Board Advisory Committees (continued)

Disability Advisory Committee

The Disability Advisory Committee evaluates nurses and CNAs regarding chemical dependency or mental disorders which may be impairing nursing practice. It also monitors recovery progress through scheduled interviews with the nurse or nursing assistant and through regular reports from employers and treatment providers.

The committee also makes recommendations to the Board regarding application and/or reinstatement of licensure/certification, and termination of probation.

The entire committee meets semiannually to review the monitoring process, conceptual model, and provider status; plan educational presentations; and formulate proposals for policy and procedural changes to the Board. Representatives of the committee meet monthly in Reno and Las Vegas.

In FY03/04, the committee evaluated 151 individuals.

Chair: Robert Buck, BSN, RN, Associate Director for Compliance

Education Advisory Committee

The purpose of this committee is to advise and report to the Board on matters related to education and continuing education. The committee consists of representatives from nursing education, nursing associations, and employers.

The committee in FY03/04 recommended, and the Board adopted, regulations that helped ease the shortage of nursing program faculty. Instead of requiring all faculty members to hold masters degrees in nursing, regulation now requires at least 75 percent to have masters degrees with a major in nursing and the other 25 percent to hold a masters or graduate degree in a field related to nursing.

Board Advisory Committees (continued)

Nursing Practice Advisory Committee

The Nursing Practice Advisory Committee advises and reports to the Board on matters related to the establishment of state standards of nursing practice. The committee consists of at least 10 persons who are knowledgeable in all areas of general nursing practice in Nevada and trends in national nursing practice.

In FY03/04, the committee recommended, and the Board adopted, changes in the LPN IV regulations and practice decisions regarding vein harvesting, sexual assault nurse examiners, and nurse consultants.
