Fiscal Year July 1, 2005 - June 30, 2006

Mission

The mission of the Nevada State Board of Nursing is to protect the public's health, safety and welfare through the effective regulation of nursing.

Introduction

ANNUAL
REPORT
2005-2006

What is the Nevada State Board of Nursing?

It is a seven-member board appointed by the governor consisting of four registered nurses, one practical nurse, one certified nursing assistant and one consumer member. The Board is advised by and appoints members to standing advisory committees. The Board appoints an executive director (a registered nurse), who is responsible for a staff of 21, which regulates a nursing population of more than 31,000.

What does the Nevada State Board of Nursing do?

The state legislature established the Board 83 years ago to regulate the practice of nursing. The scope of the Board's original responsibilities has grown dramatically since 1923, when it licensed 104 registered nurses. In 2006, it was responsible for licensing, certifying and disciplining more than 31,000 individuals, including registered nurses, licensed practical nurses, advanced practice nurses, certified nursing assistants, and certified registered nurse anesthetists. The Board's current functions include:

- Certify advanced practitioners of nursing, certified registered nurse anesthetists, and emergency medical service/registered nurses
- Approve education/training programs for ongoing competency

Discipline and Investigations

- Investigate complaints against nurses and nursing assistants
- Conduct disciplinary proceedings
- Administer remediation and rehabilitation programs, including:
 - Monitoring nurses and nursing assistants who are on disciplinary probation
 - Administering alternative program for nurses recovering from chemical dependency

What you'll find in this annual report

This report was designed to give answers to questions asked most frequently of the Board. It briefly describes our purpose and history. As an annual report, it covers the fiscal year 2005-2006, highlighting Board accomplishments and providing a statistical picture of nursing in Nevada.

Administration

- Establish minimum practice standards
- Develop and adopt regulations
- Appoint advisory committees to get direct nursing input
- Publish, distribute and provide education on the Nurse Practice Act
- Collaborate with consumers, individuals, groups and organizations
- Provide education to increase public awareness and understanding of the Board's role and purpose

Licensure, Certification and Education

- Approve schools of nursing and nursing assistant training programs
- Adopt exams for licensing/certification
- Issue certificates to nursing assistants
- License registered and practical nurses

History and Highlights

A Brief History

In 2006, the Nevada State Board of Nursing (NSBN) completed 83 years of service to the residents of Nevada. Established by the state legislature in 1923, it was modeled on legislation enacted by other countries and a few other states. The intent was to separate untrained “nurses” from those who had undergone formal training.

Nevada’s first school of nursing was established by St. Mary’s Hospital in 1909. An alumni association of the school’s graduates led the formation of the Nevada State Nurses Association in 1917. Its main objective was to “secure passage of a law providing state registration of nurses.”

Attempts to achieve this goal were made during the legislative sessions of 1915, 1919 and 1921, but all failed. In 1923, a bill was introduced by State Assemblywoman Marguerite Gosse of Reno. In spite of opposition, the bill was passed by both houses and signed into law by Governor James Scrugham on March 20, 1923.

Since its inception, the Nevada State Board of Nursing has grown from a three-member to a seven-member entity. Its functions and responsibilities have increased dramatically, as have the number of nursing care providers it oversees.

Ninety individuals have served on the Board, bringing hundreds of years of nursing experience with them. They have represented every nursing specialty and a wide range of health care settings.

In 1973, a consumer member was added to represent the viewpoint of the general public, and in 1995, a certified nursing assistant member was added to represent the CNA community.

Highlights of FY05/06

This was a year of change for the Nevada State Board of Nursing. Change in organization, in personnel, and in processes. While we experienced growing pains, we also experienced much growth. Our turnaround times for both licensure and discipline processes have decreased and our services have increased. Here are a few highlights of FY05/06:

Temporary license extended to six months

To address the increasing length of time it takes the Nevada Department of Public Safety and the FBI to

process fingerprints, the Board adopted regulation changes that extend the validity of a temporary license from four to six months. It also applied for and received rebate grants from the Criminal History Background Check Pilot Program to purchase livescan electronic fingerprint equipment for both Board offices. When implemented, the livescan technology promises fingerprint results within a matter of days.

Practice decisions and regulations revised to reflect current practice

The Board adopted practice decisions allowing school nurses to administer glucagon in emergency situations and allowing RNs to check placement of PICC lines by doing a “preliminary reading” of a chest X-ray. It also adopted regulation changes that better reflect the ongoing, collaborative relationship between physicians and advanced practitioners of nursing.

Complaints are up, resolution time is down

At the same time it experienced an almost 20 percent increase in complaints received, the Board was able to reduce case resolution time by about 30 percent. In addition, changing the compliance coordinator position from half-time to full-time has resulted in stricter monitoring of probationers and a quicker response to probation violations.

Technology and streamlined operations produce faster and more efficient services

Technological innovations have significantly reduced the time it takes for applicants to request and receive applications, for employers to verify whether nurses and CNAs have active licenses and certificates, and for nurses and CNAs to update their contact information and renew their licenses and certificates. In FY05/06, the Board funded programming changes that, when fully implemented in FY06/07, will allow all applicants for initial licensure and certification to apply and track their application status online.

To streamline operations and respond to an increased demand for services, the Board eliminated the position of associate executive director and created the positions of director of operations and education consultant. It also reorganized its Reno and Las Vegas offices to incorporate licensure and certification functions in both locations. All calls are now routed through one toll-free number answered by two receptionists who provide a variety of basic services in all Board functional areas.

Discipline Statistics

If the Nevada State Board of Nursing receives information that a nurse or nursing assistant may have broken the law (the Nevada Nurse Practice Act), the Board has the authority to investigate.

It will only investigate if the complaint is received in writing, names a nurse or nursing assistant who is licensed or certified in the state of Nevada, is signed by the person making the complaint, and alleges a violation of the Nurse Practice Act.

Before disciplinary action is taken, the Board ensures the nurse or nursing assistant is given due process, which requires giving adequate notice and description of the charges, and a hearing or the opportunity for a hearing. The individual also has the right to a formal hearing, the right to an attorney, the right to not participate in an informal hearing, the right to not sign anything, the right to see the complaint, and the right to appeal.

If the evidence doesn't support the allegations, the complaint may be dismissed or closed. If the evidence does support the allegations, the Board may take disciplinary action against the individual.

The disciplinary penalty is determined based on a number of factors which include the severity and recency of the offense, extent of patient harm, degree of deviation from standard practice, evidence of rehabilitation, current ability to practice safely, mitigating or aggravating factors, and past disciplinary history.

Disciplinary action can include denial, reprimand, fine, suspension, probation, voluntary surrender, or revocation of a license or certificate. The Board considers each case individually.

FY05-06 Probation Statistics When considering what kind of disciplinary action it should take, the Board always asks itself, "What is needed to make this person safe to practice?" The answer depends on the nature of the violation. In many cases, the Board places individuals on disciplinary probation so that it can restrict, monitor and improve the person's practice.

The Board also has a very successful alternative monitoring program that allows qualified, chemically dependent nurses and nursing assistants to re-enter the workforce in a paced sequence. It also monitors their recovery to ensure the safety of their patients.

The statistics below include all people who were on probation as of June 30, 2006.

It is important to remember that investigations can begin in one fiscal year and continue into the next fiscal year. This means that the results, or outcomes, of investigations are not necessarily reported in the same fiscal year in which the complaints were opened.

Board Advisory Committees

ANNUAL
REPORT
2005-2006

The Board is advised by and appoints members to standing advisory committees. These committees are composed of nursing professionals who are chosen based on expertise, geographic location and committee need.

Questions about nursing regulation and practice are brought to these committees for research, discussion and policy development. The Board considers the recommendations of its advisory committees during its regular meetings. Virtually every law, regulation and advisory opinion issued by the Board has been based on a recommendation by one of its advisory committees.

Committee openings are advertised in the Board's news magazine and on its website. Applications are reviewed and members are appointed at regularly scheduled Board meetings. One Board member serves as a liaison to each advisory committee; Board staff members serve as advisory committee chairs.

Advanced Practice Advisory Committee

The Advanced Practice Advisory Committee advises and reports to the Board on matters related to the practice of advanced practitioners of nursing. It consists of not more than seven persons who are knowledgeable in areas concerning APN practice.

In FY05/06, the committee recommended, and the Board adopted, regulation changes that better reflect the ongoing, collaborative relationship between the physician and the advanced practitioner of nursing.

Martha Drohobyczer, MSN, CNM (Las Vegas)
Phyllis Suiter, MS, RN, APN (Las Vegas)

Certified Nursing Assistant Advisory Committee

The Certified Nursing Assistant Advisory Committee is distinctive because its composition is defined by statute (NRS 632.072). Its duty is to advise the Board on matters relating to certified nursing assistants.

In FY05/06, the committee recommended and the Board adopted regulation changes clarifying that CNAs are allowed to document the care they give. The Board also agreed with the committee's recommendation to propose a statute change increasing the number of hours required for CNA training programs from 75 hours to 120 hours.

Board Advisory Committees (continued)

Disability Advisory Committee

The Disability Advisory Committee evaluates nurses and CNAs regarding chemical dependency or mental disorders which may be impairing nursing practice. It also monitors recovery progress through scheduled interviews with the nurse or nursing assistant and through regular reports from employers and treatment providers.

The committee also makes recommendations to the Board regarding application and/or reinstatement of licensure/certification, and termination of probation.

The entire committee meets semiannually to review the monitoring process, conceptual model, and provider status; plan educational presentations; and formulate proposals for policy and procedural changes to the Board. Representatives of the committee meet monthly in Reno and Las Vegas.

In FY05/06, the committee evaluated 138 individuals.

Chair: Kathleen Reynolds, BHS, RN, Compliance Coordinator

Liaison: Doreen Begley, MS, RN

Education Advisory Committee

The purpose of this committee is to advise and report to the Board on matters related to education and continuing education. The committee consists of representatives from nursing education, nursing associations, and employers.

In FY05/06, the committee held several discussions and considered proposals regarding reducing the education requirements for clinical faculty in BSN nursing education programs.

Board Advisory Committees (continued)

Nursing Practice Advisory Committee

The Nursing Practice Advisory Committee advises and reports to the Board on matters related to the establishment of state standards of nursing practice. The committee consists of at least 10 persons who are knowledgeable in all areas of general nursing practice in Nevada and trends in national nursing practice.

In FY05/06, the committee recommended, and the Board adopted, changes in the practice decisions regarding RNs administering anesthetic agents, PICC line placement verification, school nursing, and epidural catheter removal. The Board also adopted the committee's recommendation to change the policy regarding validation of the reference materials used in making decisions about current nursing scope of practice.
