Mission

The mission of the Nevada State Board of Nursing is to protect the public's health, safety and welfare through the effective regulation of nursing.

Introduction

ANNUAL
REPORT
2006-2007

What is the Nevada State Board of Nursing?

It is a seven-member board appointed by the governor consisting of four registered nurses, one practical nurse, one certified nursing assistant and one consumer member. The Board is advised by and appoints members to standing advisory committees. The Board appoints an executive director (a registered nurse), who is responsible for a staff of 21, which regulates a nursing population of more than 33,000.

What does the Nevada State Board of Nursing do?

The state legislature established the Board 83 years ago to regulate the practice of nursing. The scope of the Board's original responsibilities has grown dramatically since 1923, when it licensed 104 registered nurses. In 2007, it was responsible for licensing, certifying and disciplining more than 33,000 individuals, including registered nurses, licensed practical nurses, advanced practice nurses, certified nursing assistants, and certified registered nurse anesthetists. The Board's current functions include:

- Certify advanced practitioners of nursing, certified registered nurse anesthetists, and emergency medical service/registered nurses
- Approve education/training programs for ongoing competency

Administration

- Establish minimum practice standards
- Develop and adopt regulations
- Appoint advisory committees to get direct nursing input
- Publish, distribute and provide education on the Nurse Practice Act
- Collaborate with consumers, individuals, groups and organizations
- Provide education to increase public awareness and understanding of the Board's role and purpose

Licensure, Certification and Education

- Approve schools of nursing and nursing assistant training programs
- Adopt exams for licensing/certification
- Issue certificates to nursing assistants
- License registered and practical nurses

Discipline and Investigations

- Investigate complaints against nurses and nursing assistants
- Conduct disciplinary proceedings
- Administer remediation and rehabilitation programs, including:
 - Monitoring nurses and nursing assistants who are on disciplinary probation
 - Administering alternative program for nurses recovering from chemical dependency

What you'll find in this annual report

This report was designed to give answers to questions asked most frequently of the Board. It briefly describes our purpose and history. As an annual report, it covers the fiscal year 2006-2007, highlighting Board accomplishments and providing a statistical picture of nursing in Nevada.

History and Highlights

A Brief History

In 2006, the Nevada State Board of Nursing (NSBN) completed 83 years of service to the residents of Nevada. Established by the state legislature in 1923, it was modeled on legislation enacted by other countries and a few other states. The intent was to separate untrained “nurses” from those who had undergone formal training.

Nevada’s first school of nursing was established by St. Mary’s Hospital in 1909. An alumni association of the school’s graduates led the formation of the Nevada State Nurses Association in 1917. Its main objective was to “secure passage of a law providing state registration of nurses.”

Attempts to achieve this goal were made during the legislative sessions of 1915, 1919 and 1921, but all failed. In 1923, a bill was introduced by State Assemblywoman Marguerite Gosse of Reno. In spite of opposition, the bill was passed by both houses and signed into law by Governor James Scrugham on March 20, 1923.

Since its inception, the Nevada State Board of Nursing has grown from a three-member to a seven-member entity. Its functions and responsibilities have increased dramatically, as have the number of nursing care providers it oversees.

Ninety individuals have served on the Board, bringing hundreds of years of nursing experience with them. They have represented every nursing specialty and a wide range of health care settings.

In 1973, a consumer member was added to represent the viewpoint of the general public, and in 1995, a certified nursing assistant member was added to represent the CNA community.

Highlights of FY06/07

The Board continues to focus on its public protection mission, while removing unnecessary regulatory barriers and improving services in all areas. Here are a few highlights of FY06/07:

National report rates Nevada high

In the National Council of State Boards of Nursing (NCSBN) Commitment to Ongoing Regulatory Excellence (CORE) survey of 42 nursing boards from across the country. Nevada’s practices consistently rated “good” or “excellent,” and in several instances,

they were identified as “best practices.”

Policy helps address faculty shortage

At its November meeting, the Board extended to bachelor degree programs its policy allowing a waiver of MSN requirement for clinical faculty.

The policy grants the Board’s executive director authority to waive the requirement for a masters of science in nursing degree for clinical faculty in both bachelors and associate degree programs.

In making these changes, Board members said they wanted to provide a tool that would help nursing education programs solve the state’s nursing faculty shortage without compromising the education of Nevada’s nursing students.

Many different individuals and groups, including legislators, educators, and business and nursing leaders, worked diligently on this issue, bringing their differing perspectives and backgrounds to enrich the discussion and craft a solution that is not only helping solve a critical shortage, but also helping protect the health, safety, and welfare of Nevada’s citizens.

Regulations revised to remove barriers, reflect current practices

In public workshops and hearings, the Board adopted several regulation revisions. Among them were changes that extended the validity of a temporary license from four to six months to allow time to receive fingerprint results, clarified that CNAs are allowed to document the care they give, and removed barriers and streamlined the collaborative relationship between the physician and the advanced practitioner of nursing.

Technological innovations reduce paperwork and speed processes

The Board receives and processes more than a thousand applications a month, which translates into tens of thousands of documents a year. To decrease storage costs and improve access to records, staff members now use technology to scan the documents and attach them to the individual records in the Board’s database. While decreasing storage costs, this innovation has also improved access to records.

As a participant in a government grant program, the Board has installed electronic fingerprinting systems in both of its offices. When fully implemented, the technology promises a turnaround in fingerprint results of under two weeks.

***Provisional approval:** Schools that have provisional approval meet the initial requirements of Nevada laws and regulations to offer a program of nursing education in Nevada. To obtain full approval, they must gain national accreditation (which they cannot do until after their first class is graduated), and they must achieve a first-time pass rate of 80 percent or higher on the NCLEX (an annual average). If individuals graduate from a school that has provisional rather than full approval, they are eligible for Nevada licensure.

The Board approved these schools to conduct only the clinical portion of their nursing programs in Nevada.

Investigation Statistics

If the Nevada State Board of Nursing receives information that a nurse or nursing assistant may have broken the law (the Nevada Nurse Practice Act), the Board has the authority to investigate. It will only investigate if the complaint is received in writing, names a nurse or nursing assistant who is licensed or certified in the state of Nevada, is signed by the person making the complaint, and alleges a violation of the Nurse Practice Act. Investigations are also generated from nurses and nursing assistants who answer “yes” to one or more of the five screening questions asked on initial and renewal applications for licensure/certification.

Before disciplinary action is taken, the Board ensures the nurse or nursing assistant is given due process, which requires giving adequate notice and description of the charges, and a hearing or the opportunity for a hearing. The individual also has the right to a formal hearing, the right to an attorney, the right to not participate in an informal hearing, the right to not sign anything, the right to see the complaint, and the right to appeal.

If the evidence doesn't support the allegations, the complaint may be dismissed or closed. If the evidence does support the allegations, the Board may take disciplinary action against the individual. If the investigation is generated from an answer to the application screening questions, depending upon the nature of the “yes” answer and the evidence received, the application may be cleared without disciplinary action or heard by the Board for final disposition, up to and including disciplinary action.

The disciplinary penalty is determined based on a number of factors which include the severity and recency of the offense, extent of patient harm, degree of deviation from standard practice, evidence of rehabilitation, current ability to practice safely, mitigating or aggravating factors, and past disciplinary history.

Disciplinary action can include denial, reprimand, fine, suspension, probation, voluntary surrender, or revocation of a license or certificate and may include requirements such as continuing education or drug testing. The Board considers each case individually.

FY06-07 Probation Statistics When considering what kind of disciplinary action it should take, the Board always asks itself, “What is needed to make this person safe to practice?” The answer depends on the nature of the violation. In many cases, the Board places individuals on disciplinary probation so that it can restrict, monitor and improve the person's practice. The Board also has a very successful alternative monitoring program that allows qualified, chemically dependent nurses and nursing assistants to re-enter the workforce in a paced sequence. It also monitors their recovery to ensure the safety of their patients. The statistics below include all people who were on probation as of June 30, 2007.

Board Advisory Committees

ANNUAL
REPORT
2006-2007

The Board is advised by and appoints members to standing advisory committees. These committees are composed of nursing professionals who are chosen based on expertise, geographic location and committee need.

Questions about nursing regulation and practice are brought to these committees for research, discussion and policy development. The Board considers the recommendations of its advisory committees during its regular meetings. Virtually every law, regulation and advisory opinion issued by the Board has been based on a recommendation by one of its advisory committees.

Committee openings are advertised in the Board's news magazine and on its website. Applications are reviewed and members are appointed at regularly scheduled Board meetings. One Board member serves as a liaison to each advisory committee; Board staff members serve as advisory committee chairs.

Advanced Practice Advisory Committee

The Advanced Practice Advisory Committee advises and reports to the Board on matters related to the practice of advanced practitioners of nursing. It consists of not more than seven persons who are knowledgeable in areas concerning APN practice.

In FY06/07, the committee recommended, and the Board adopted a *Record of Practice and Protocol Guidelines* to assist APNs in meeting certification requirements. It also recommended changes to the regulatory definition of "nurse midwife" to accurately reflect the current qualifications and education of nurse midwives.

Chair: Debra Scott, MSN, RN, APN, Executive Director

Liaison: David Burgio, MS, RN, APN

Committee Members:

Amy Booth, MS, RN, APN (Reno)
Tricia Brown, MSN, RN, APN (Reno)

Susan VanBeuge, MSN, RN, APN (Las Vegas)
Ronnie Wing, MSN, RN, CRNA (Spring Creek)

Certified Nursing Assistant Advisory Committee

The Certified Nursing Assistant Advisory Committee is distinctive because its composition is defined by statute (NRS 632.072). Its duty is to advise the Board on matters relating to certified nursing assistants.

In FY06/07, the committee recommended a regulation change to reduce to 40 the number of hours of employment a CNA needed to work under the direction of a licensed nurse for renewal of a certificate. It also recommended the Board revise its regulations to require that the coordinator of an approved CNA training program be a registered nurse.

Chair: Chris Sansom, BSN, RN, Director of Operations

Liaison: Dorothy Perkins, CNA

Board Advisory Committees (continued)

Disability Advisory Committee

The Disability Advisory Committee evaluates nurses and CNAs regarding chemical dependency or mental disorders which may be impairing nursing practice. It also monitors recovery progress through scheduled interviews with the nurse or nursing assistant and through regular reports from employers and treatment providers.

The committee also makes recommendations to the Board regarding application and/or reinstatement of licensure/certification, and termination of probation.

The entire committee meets semiannually to review the monitoring process, conceptual model, and provider status; plan educational presentations; and formulate proposals for policy and procedural changes to the Board. Representatives of the committee meet monthly in Reno and Las Vegas.

In FY06/07, the committee evaluated 143 individuals.

Chair: Kathleen Reynolds, BHS, RN, Compliance Coordinator

Liaison: Doreen Begley, MS, RN

Education Advisory Committee

The purpose of this committee is to advise and report to the Board on matters related to education and continuing education. The committee consists of representatives from nursing education, nursing associations, and employers.

In FY06/07, the committee recommended and the Board adopted a revised policy granting the Board's executive director authority to waive the requirement for a masters of science in nursing degree for clinical faculty in both bachelors and associate degree programs.

Board Advisory Committees (continued)

Nursing Practice Advisory Committee

The Nursing Practice Advisory Committee advises and reports to the Board on matters related to the establishment of state standards of nursing practice. The committee consists of at least 10 persons who are knowledgeable in all areas of general nursing practice in Nevada and trends in national nursing practice.

In FY06/07, the committee recommended and the Board adopted two new practice decisions: one allowing RN initiation of administration of Vitamin K, Erythromycin eye ointment, and Hepatitis B vaccine for newborns; and the other allowing RN use of ultrasound guidance to place a peripheral intravenous catheter in the upper extremity. The Board also adopted the committee's recommendation to strengthen the Procedural Sedation Practice Decision to require on-site availability of emergency personnel and equipment.
