R.Colosimo stated that the Education Advisory Committee has reviewed all education regulations and the regulatory promulgation process has begun.
3. Review, discussion regarding the existing practice decision and the role of the RN in Conscious Sedation. M. Brown suggested changes to the section under management of nursing care, last sentence, “the RN has the right and obligation to act as the patient’s advocate by refusing to administer or continue to administer any medication not in the patient’s best interest” and suggested moving the sentence to the section on safety considerations. The committee members agreed with the suggestion. No vote was taken due to the absence of a quorum.
4. Discussion regarding the role of the RN in the administration of low dose Ketamine IV for post-operative pain on a medical-surgical unit. Danielle Craperi from Renown Healthcare brought the question to the Committee for discussion. D. Scott referenced NAC 632.225 additional duties in area of specialization stating that if all criteria are met in the regulation, there is no need for a new practice decision. The previous request was discussed in February, 2012 and the request was received from the Chief Nursing Officer at St. Rose Dominican requesting that RNs be able to administer low dose Ketamine IV for migraine pain control on a medical unit.
