

2016 CORE Report: Education, Licensure, and Discipline Results

January 11-13, 2017 Board Meeting

NCSBN

National Council of State Boards of Nursing

What is CORE?

- CORE (Commitment to Ongoing Regulatory Excellence) is a comparative performance measurement and benchmarking process for state boards of nursing (BONs).
- Initiated in 1998 by NCSBN's Board of Directors and incorporated surveys of BONs, as well as three external stakeholder groups.
- Track the effectiveness and efficiency of nursing regulation nationally to assist BONs with improving program performance and providing accountability to higher levels of authority and the public.

Data Collection and Processing

- The four CORE surveys were conducted in a staggered schedule starting in the July of 2016 and ending in the September of 2016.
- 38 BONs responded to the CORE survey.
- Approximately 1,500 nurses licensed from 44 BONs were included in the survey, drawn by simple random samples taken from Nursys® or directly from BONs that do not contribute data to Nursys®.
- Approximately 300 employers of nurses within the purview of each BON were mailed hard copies of the employee survey.
- For nursing education programs, surveys were distributed to the program directors of all nursing education programs in the US with an NCLEX code.
